

# NITTA RESPIRATORS 9510

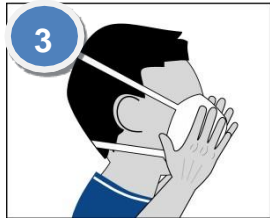

## USER'S INSTRUCTIONS

1. Check the respirator, take it with one hand and with the other, take the elastic bands.

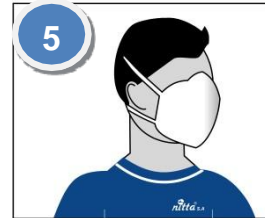

2. Place respirator under chin and pull the elastic bands above your head, placing bottom band on your nape and top strap on the top of your head.

3. Adjust the respirator to your face and adjust the nose clip around your nose, using the fingertips of both hands.

4. Before entering the work area, check the fit of the respirator by covering it with both hands and inhaling drastically, you should feel a slight negative pressure inside the respirator; if air escapes around the contour of the respirator, adjust it again and check. If proper adjustment is not possible, Replace respirator.

5. Always remember to follow these instructions carefully, as they are important for the safe use of the respirator.

### CAUTION

This respirator helps to protect against certain particles.  
**The improper use can cause illness or death.**

Before occupational use of this respirator, a written respiratory protection program must be implemented meeting all the local government requirements. In the United States, employers must comply with OSHA 29 CFR 1910.134 which includes medical evaluation, training, and fit testing.
